

# RADON In Homes: Get the Facts & Then Act

**Exposure to radon is the second leading cause of lung cancer in the UK, after smoking**

**Radon is linked to over 1100 lung cancer deaths each year in the UK**

**Some radon is present in all homes, but the only way to find out if you are at greater risk is to carry out a test**

**Radon test kits are inexpensive, easy to use & can be ordered online**

**If elevated radon levels are found, contact a radon remediation specialist to design & install a mitigation system**
