HEALTHY LIVING

# RADON In Homes: Get the Facts & Then Act

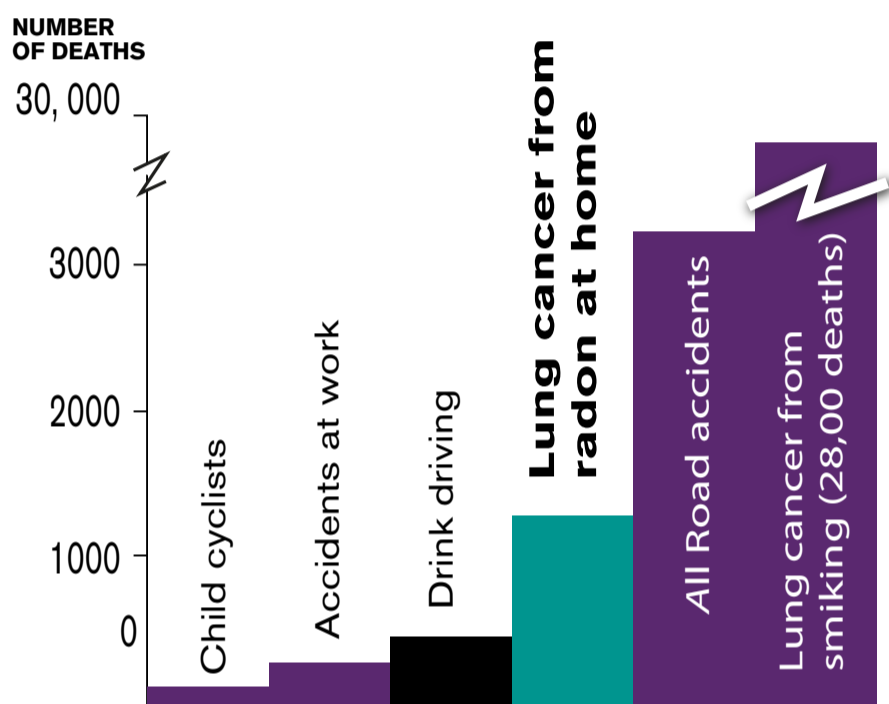

Exposure to radon is the second leading cause of lung cancer in the UK, after smoking

Radon is linked to over 1100 lung cancer deaths each year in the UK

## Radon deaths

compared with other causes of premature deaths per year in the UK

Some radon is present in all homes, but the only way to find out if you are at greater risk is to carry out a test

Radon test kits are inexpensive, easy to use & can be ordered online

If elevated radon levels are found, contact a radon remediation specialist to design & install a mitigation system
